

Bucket Hose Wrap Instructions

How to Use:

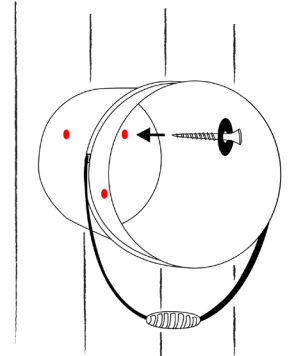

1. Find a flat surface on a wall to hang up the Bucket Hose Wrap (preferably near a water hook-up).

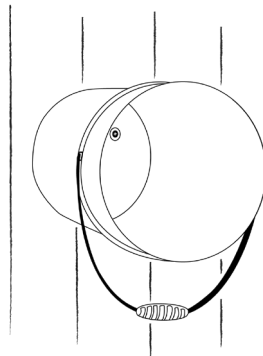

2. Hold the bucket up to the wall and align the pre-made holes in the bottom of the bucket so that there are two parallel holes on top and one hole centered on the bottom with the bucket handle hanging down.

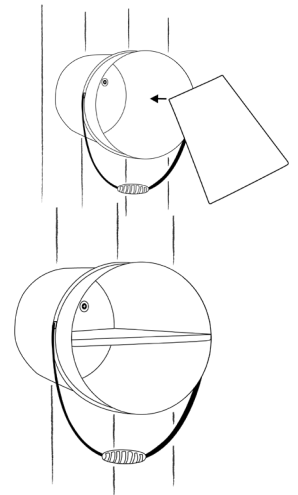

3. Using the provided screws and washers, place one washer over one screw and into one of the pre-made holes on the bucket.

4. Use the 3 provided screws with accompanying washers to mount the Bucket Hose Wrap on the wall.

5. Place the wooden shelf insert inside the bucket. One end of the wooden shelf is narrower than the other (make sure the narrower side goes into the bucket first).

6. Next, put the lid on the Bucket Hose Wrap and press until it is locked into place. Your Bucket Hose Wrap is now ready to use!
